Oracle Enterprise Data Management Cloud EDMCS

Course Description

It's another master data management tool more alike DRM i.e. Data Relationship Management. EDMCS is on cloud and it offers a different vision on master data and data hierarchy management. EDMCS focuses to bring data from the source i.e. from individual applications and drop off on cleansing and mastering the data. So when opportunities and potential challenges arise financial team pivot the needed data. EDMCS is designed to accommodate this cause or effect.

Oracle Enterprise Data Management Cloud EDMCS online training curriculum

- ➢ **Overview of EDMCS**

- ➢ **On-premise DRM Vs EDMCS**

The Terminology of EDMCS
- Nodes & Types of Nodes
- Node Types
- Hierarchy Sets
- Node Set
- View & Viewpoints
- Properties
- Request

Working with Applications
- Understanding Application Types
- Understanding Registering Applications
- Understanding Dimensions
- Understanding Modifying Applications
- Importing Dimensions
- Exporting Dimensions

Working with Planning Applications
- Registering Planning Applications
- Registering Cubes, Application Settings, and Dimensions
- Predefined Properties for Planning Applications
- Importing Planning Dimensions
- Exporting Planning Dimensions

Working with Oracle Financials Cloud General Ledger Applications
- Registering Oracle Financials Cloud General Ledger Applications
- Registering Segments and Trees
- Applying Registration Changes
- Predefined Properties for Oracle Financials Cloud General Ledger Applications
- Importing Oracle Financials Cloud General Ledger Dimensions
- Exporting Oracle Financials Cloud General Ledger Dimensions

Working with Custom Applications
- Registering a Custom Application
- Adding, Removing, or Modifying a Custom Application Dimension
- Custom Dimension Import and Export Settings
- Adding or Modifying a Node Type for a Custom Dimension
- Importing a Custom Application Dimension
- Exporting a Custom Application Dimension

Working with View &Viewpoints
- Creating View &Viewpoints
- Inspecting &Downloading a Viewpoint
- Sharing the data between viewpoints
- Comparing Viewpoints
- Alternate Viewpoint
- Subscription
- Mapping Viewpoint
- Archiving & Deleting View & Viewpoint

Working with Request
- Making Changes Interactively through Request
- Making Changes Using a Load File
- Action code for Load Request file
- Inspecting Requests

Security
- My Services Roles for EDMCS
- Creating User & Groups
- EDMCS Component Level Security

Workflow & Approvals
- Workflow Stages
- Approval Process
- Process Flow

➢ **Daily Maintenance & Migration**

➢ **EPM Automate Commands for EDMCS**

➢ **Questions and Answer Session**
