

Hyperion Training Program

S.No	Topic	Duration (Hours)
1	Data Warehousing Fundamentals	6
2	Hyperion Analytics Services (Essbase) + Essbase Integration Services/Data Integration Manager/Hyperion Application Link Complete implementation of Sales Tracking Case Study	25
3	Hyperion Web Analysis (Analyzer)	4
4	Hyperion Planning	12
5	Hyperion Interactive Reports	20
6	Hyperion Financial Management	37 Hours

Deliverable:

1. Students Guides.
2. Video Tutorials recorded session for all classes.
3. Lab Guide.
4. Reference URLs
5. Certification Questions *** (Provided that you have opt that options)

Contact Point : aloo_a2@yahoo.com
Teradata_expert@yahoo.com

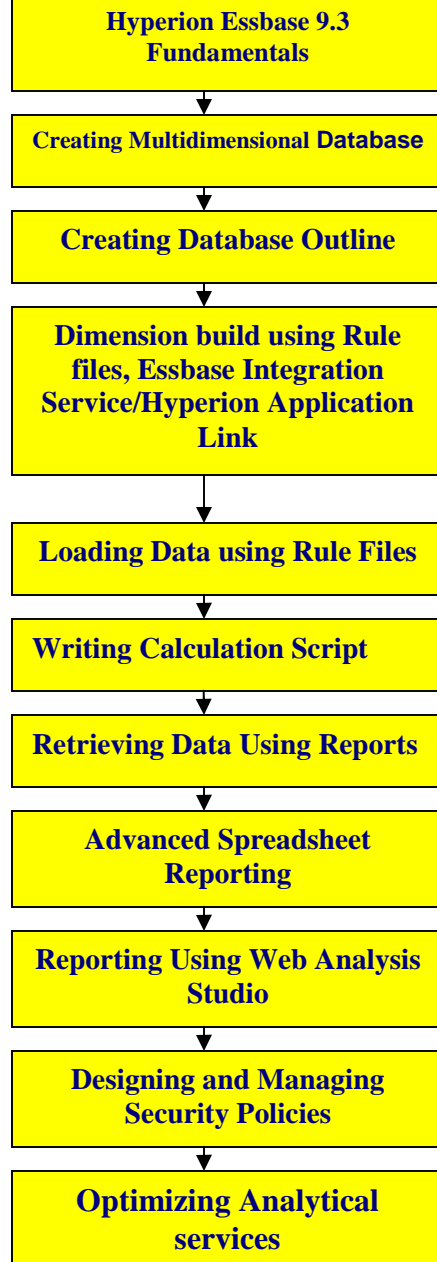

Topic # 1 Data Warehousing Fundamentals

Session #	Date and Time	Area of Focus	Session Topics
1	Day 1 Duration 5 Hours	Understanding fundamentals of Data warehousing	<p>DATA WAREHOUSE OVERVIEW</p> <ul style="list-style-type: none"> a. Overview b. Typical uses <p>DEFINITION, ARCHITECTURE AND CONCEPTS</p> <ul style="list-style-type: none"> c. Enterprise Data Model d. Operational vs. historical data e. Extract Transform Load (ETL) f. Metadata g. Data warehouse vs. data mart h. Data mining i. OLAP vs. OLTP j. Massive size implementation k. Logical design vs. physical design l. Normalization vs. denormalization m. Referential constraints <p>DATA MODELLING OPTIONS</p> <ul style="list-style-type: none"> n. Entity model o. Star schema p. Snowflake schema <p>DATA MODELLING DEVELOPMENT LIFE CYCLE</p> <ul style="list-style-type: none"> q. Requirements analysis r. Requirements gathering s. Schema design t. Warehouse design u. Implementation V. Follow-up and review
2	Day 1 3 Hours	Self Learning Developing candidates understanding by reading case studies and exploring latest treads in current scenario.	<p>1 Developing understanding about Data warehouse fundamentals and latest techniques.</p> <ul style="list-style-type: none"> 1) Exploring current trends and techniques. 2) Reading case studies(Visiting Forums/Case studies).

3	Day 2 Duration 1 Hour	Quiz # 1 & Discussion Data Warehousing Fundamentals Quiz.	1. Quiz to identify the how far candidates are comfortable with Data warehousing fundamentals understanding - I.
4	Day2 Duration 4 Hours		<p>DIMENSIONAL MODELLING DESIGN</p> <ul style="list-style-type: none"> w. Overview x. Metadata properties y. Star schema z. Snowflake schema aa. Cubes bb. Measures and facts cc. Attributes and relationships dd. Dimension ee. Hierarchies ff. Joins gg. Summary tables and aggregation hh. Exercises <p>IMPLEMENTATION OPTIONS</p> <ul style="list-style-type: none"> ii. Overview jj. Top down kk. Bottom up ll. Sizing mm. Cleaning nn. Populating the data warehouse <p>EXTRACT, TRANSFORM & LAOD (ETL) CONSIDERATIONS</p> <ul style="list-style-type: none"> oo. Definition and scope pp. Extract options qq. Transform options rr. Load options ss. Surrogate key concepts tt. Slowly Changing Dimensions (SCD)
5	Day 2 Self Learning 2 Hours	Understanding advance DWH Concepts	<p>Developing DHW designing constraints.</p> <ul style="list-style-type: none"> 3) Understanding DWH Design constrains and techniques. 4) Reading case studies (Visiting Forums/Case studies).

6	Day 2 1 hour	Session ending Quiz # 2 & Discussion	1. Quiz to identify the how good candidate is Data warehousing Design constraints and DWH understanding - II
---	-----------------	---	--

Topic # 2 Hyperion Analytics Services (Essbase)

Session #	Date and Time	Area of Focus	Session Topics
1	Day 3 1 Hour	Understanding the OLAP fundamentals with respect to Essbase	Online Analytical Processing Overview 1. Data Transformation. 2. Multidimensional View of Information 3. Multidimensional Data Model and Data Analysis Technique. 4. OLAP Solutions
2	Day 3 1 Hours	Hyperion system 9 overview and concept building for Analytical services	Analytic Services Overview 1. Business Performance Management 2. Hyperion System 9 Overview 3. Hyperion Analytic Solution 4. Analytic Services 5. Analytic Administration Services
3	Day 3 4 Hour	Understanding Multidimensional Database design implications. Defining Dimensions and its members.	Creating Multidimensional Databases & Application. 1. Life Cycle of the Essbase Analytics Database Design 2. Creating Essbase Analytics Applications and Databases 3. Creating and Managing Database Outlines 4. Creating Time, Accounts, and Scenario Dimensions
	Day 3 2 Hours	Quiz , Discussion & Self Learning	Understanding Multi Dimensional Database concepts. Essbase Overview. Essbase fundamentals
4	Day 4 3 Hours	Practice #1 <ul style="list-style-type: none"> • Creating multidimensional Database for sample application. • Defining Dimension types for sample application. • Real time issues during Database & application creation. 	
	Day 4 1 Hour	Essbase Fundamentals Quiz #1	Essbase Quiz to identify candidates comfort level at MDD fundamentals and Essbase overview.

4	Day 4 2 Hours	Implementation of Dimensions and members in Essbase Outline	Enhancing Database Outlines <ol style="list-style-type: none"> 1. Creating Business-view Dimensions 2. Specifying Consolidation Operators and Defining Calculations 3. Setting Time Balance Properties 4. Creating Label-Only and Shared Members 5. Defining Duplicate Member Names and Member Aliases 6. Creating Attribute Dimensions
	Day 4 1 Hours	Self Learning & Discussion	Understand Essbase Outline, Dimensions, Members and Member type. Identify general issues/error occurs during outline creation.
5	Day 5 1 Hours	Practice #2 <ul style="list-style-type: none"> o Creating Database outline for sample application. o Defining Dimension and its members. o Determining Dimension type and setting member properties. o Issues while creating members and setting its properties. 	
	Day 5 1 Hour	Essbase Quiz #2 & Discussion	Essbase Quiz to identify candidates comfort level at MDD fundamentals and Essbase overview.
	Day 5 2 Hours	Understanding needs of Dynamic Dimension Building using Rule files.	Creating Basic Dimensions Build Rules Files <ol style="list-style-type: none"> 1. Data Prep Editor overview 2. Creating Dimensions using Rules Files 3. Selecting Dimension Build Method 4. Defining Field Properties 5. Validating Dimension Build Rules Files 6. Configuring Dimension Maintenance Settings
	Day 5 3 Hours	An introduction to EIS	Creating Dimension and loading data using EIS. <ol style="list-style-type: none"> 1. Designing OLAP Model using EIS. 2 Building Metaoutling. 3 Building Dimension and loading data.
	Day 5 2 Hour	Self Learning	Understanding dynamic dimension building using rule files and Outline Editor.

	Day 6 2 Hours	Practice #3 Dimension creation using own rule file (user defined) for the sample application. Runtime changing Dimension & its member properties. Issues involved during Rule file creation and execution.	
6	Day 6 2 Hours	Changing Dimension and Member type dynamically	Creating Advanced Dimension Build Rules Files <ol style="list-style-type: none"> 1. Creating Shared Members 2. Manipulating Fields 3. Creating User-Defined Attributes
	Day 6 2 Hours	Attribute dimension overview	Creating Attribute Dimensions <ol style="list-style-type: none"> 1. Adding Attribute Dimensions to Outlines 2. Design Considerations for Attribute Dimensions 3. Creating Attributes with Rules Files
	Day 6 2 Hours	Self Learning & Discussion	Scanning forums and identifying common issues and errors while creating Dimensions, Members and outlines.
	Day 6 2 Hours	Practice #4 <ul style="list-style-type: none"> • Setting member advanced properties using rule files for sample application. • Common error and issues while Dimension building. 	
	Multiple Choice Questions (Day 3- Day 6) <ul style="list-style-type: none"> • OLAP fundamentals • Analytical Services (Essbase). • Hyperion System 9 • Multidimensional Database concept • Essbase Database Outline. • Basic operations on Database outline. • Various types of Outline • Rule files for Dynamic Outline preparation • Member properties (Shared, Never Shared, UDA) • Attribute Dimension 		
8	Day 7 Hours 4	Loading data into outlines and dealing issues during data loading.	Loading Data <ol style="list-style-type: none"> 1. Data Load Options 2. Loading Data from Flat Files 3. Performing Free-Form Data Loads 4. Loading Data with Rules Files 5. Loading Data from SQL Data Sources

	Day 7 Hours 2	Practice #5 <ul style="list-style-type: none"> Defining new Dimension as attribute type using Outline editor Defining new Dimension as attribute type using Rule Files Free form loading data. Loading data using Rule files(with Multiple scenario) in Sample Basic application Loading data from SQL Source Dealing with error files. Issues related load data fail. 	
	Day 7 Hour 2	Session end quiz, Self Learning & Discussion	Visiting to the forums and identifying various means to upload data into Essbase. Optimizing the load process and various techniques to load data using rule and free form loading.
9	Day 8 4 Hours	Understanding & Implementing Business Rules using Calc Script	Calculating the Essbase Analytics Database <ol style="list-style-type: none"> Outline Calculations Calculation Scripts Two-Pass Calculations Dynamic Calculations Dynamic Time Series
	Day 8 2 Hours		Practice #6 <ul style="list-style-type: none"> Writing basic calc script. Writing Outline calc script. Developing formulas. Calculating Time Series Data Developing Calculation Scripts Common error while writing calc scripts
	Day 8 2 Hours	Session end quiz, Self Learning & Discussion	Identifying commonly used formulas and issues associated with them.
	Multiple Choice Questions (Day 7- Day 8) <ul style="list-style-type: none"> Loading data under various scenarios (Free form and Rule Files). Dynamic Outline creation with loading data. Building simple calculation scripts. Advance calc scripts. 		

10	Day 9 Hours 4	Navigating Data using report script and smart view(short cut)	Retrieving Data <ol style="list-style-type: none"> 1. Smart View Overview 2. Connecting to the Analytic Server 3. Retrieving Multidimensional Data into Two-dimensional Spreadsheet Reports 4. Navigating Through Spreadsheet Reports 5. Manipulating Multidimensional Data 6. Smart View Options. 7. Report Scripts.
	Day 9 2 Hours	Practice #7 Writing Report scripts (Essbase reports script) for sample Basic Database. Writing basic Spread Sheet reports(Using Drill Down, Drill UP, Pivots) Basic Spread Sheet Reports Issues and common error occurs during data retrieval.	
	Day 9 2 Hour	Session end quiz, Self Learning & Discussion	Visiting forums and seeing sample reports, i.e Top 'N' Analysis, Drill Down, Roll Up, Pivoting queries.
	Day 10 3 Hours	Building reports using MS Excel with Hyperion Essbase client.	Advanced Spreadsheet Reporting <ol style="list-style-type: none"> 1. Updating Data on the Analytic Server 2. Creating Free-Form Reports 3. Selecting Members 4. Creating Reusable Queries 5. Extending the Spreadsheet 6. Environment with Visual Explorer
	Day 10 2 Hours	Understanding basic security policies and user management	Designing and Managing Security Policies <ol style="list-style-type: none"> 1. User Management and Security 2. Controlling Access to Database Cells
	Day 10 2 Hours	Practice #8 <ul style="list-style-type: none"> • Data loading using Spread Sheet. • Writing Free form reports for sample basic application • Writing Spread Sheet Queries. • Advance spread sheet reports. 	

	Day 10 1 Hours	Session end quiz, Self Learning & Discussion	Viewing and implementing spread sheet reports and
	Day 11 2 Hours	Practice #10 <ul style="list-style-type: none"> • Creating users & groups. • Setting access permissions. • Defining security policies for Database 	
	Day 11 3 Hours	Understanding various techniques to enhance Analytical Services Performance.	Monitoring Performance <ol style="list-style-type: none"> 1. Improving Analytic Services Performance. 2. Optimizing Analytic Services Caches. 3. Optimizing Database Restructuring. 4. Optimizing Data Loads. 5. Optimizing Calculations. 6. Optimizing Reports and Other Types of Retrieval.
	Day 11 3 Hours	Session end quiz, Self Learning & Discussion	Understand the data load, Reports retrieval optimization techniques. Considering various real time scenarios. Issues and errors need to deal while implementing optimizing.
Multiple Choice Questions (Day 9- Day 11) <ul style="list-style-type: none"> • Data retrieval using spread sheet reports • Data loading using Spread Sheet • Advance Spread Sheet Reports 			

Topic # 3 Hyperion Web Analysis (Analyzer)

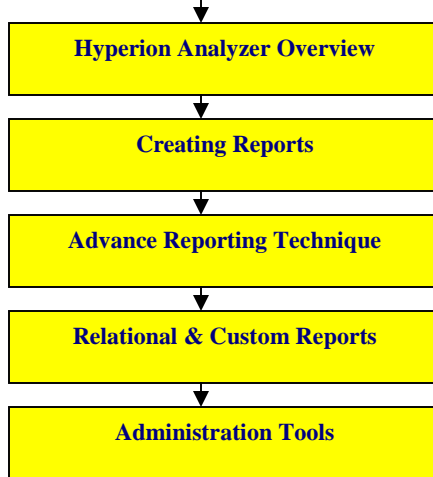

Hyperion Analyzer Overview

Creating Reports

Advance Reporting Technique

Relational & Custom Reports

Administration Tools

Session #	Date and Time	Area of Focus	Session Topics
1	Day 12 Hours 3	Understand the installation steps and creating basic reports.	Installation of Hyperion Analyzer Setting up environment. Hyperion Analyzer Overview.
2	Day 12 Hour 1	Designing web reports	Creating Basic reports
	Day 12 Hours 2	Practice # 1 <ul style="list-style-type: none"> • Designing basic reports • Report with filters 	
	Day 12 Hours 1	Self learning	Visiting forums and identifying the real time implementation of Hyperion Analyzer reporting. Designing basic reports and sample reports.
	Day 12 Hours 1	Quiz & Discussion.	Identifying the needs of developing Analyzer reports and integrating with Essbase Database.
3	Day 13 Hour 2	Designing Custom Reports	Designing Pinboards, Custom reports, HTML Web Clients
	Day 13 Hours 1	Designing Advance Reports	Designing Advance and Relational reports.
	Day 13 Hours 1	General Analyzer Administration	Administration Tools
	Day 13 Hours 2	Practice# <ul style="list-style-type: none"> • Customizing reports • Designing pinboards • HTML Web clients • Designing Advance and Relational reports. • Report Administration. 	
	Day 13 Hours 1	Self Learning	Identifying technical issues and sample case study.
	Day 13 Hours 1	Technical Discussion	Discussion about common issues and technique follows while report creation.
	Multiple Choice Questions (Day 12- Day 13) <ul style="list-style-type: none"> • Hyperion Analyzer Concepts • Designing web reports • Hyperion Analyzer Advance Designing 		

Topic # 4 Essbase Case Study Sales Tracking

Understanding Business Requirements

Analyzing the current system and plan for the Database Outline

Process for designing a Database

Designing Multidimensional Database Outline

Loading Data from Flat files/RDBMS

Customizing Calculation script

Writing Spread Sheet & Web Reports

Essbase Server Administration

Essbase Server Optimization and Monitoring performance

***Note : This case study is now part of Essbase Training.

Session #	Date and Time	Area of Focus	Session Topics
1	Day 14 Hours 2	Understanding Business Requirements	Explaining sales tracking system process flow diagram, various entities involved Draw ER Diagram.
2	Day 14 Hours 6	Analyzing the current system and plan for the Database Outline	Writing SRS and process flow diagram. Technical documentations(HLD LLD)
3	Day 15 Hours 4		
4	Day 15 Hours 4	Dimensional Modeling Basics Process for designing a Database	Design Data Model. Identifying Dimensions, Members, Measures (Fact Table), DWH Operations. Writing documentations for the all the above.
5	Day 16 Hours 8	Designing Multidimensional Database Outline & Loading Data from Flat files	Mapping DWH concept and design model with real time Essbase Outline designing. Loading data from Data Source.
6	Day 17 Hours 4	Customizing Calculation script	Writing basic calculations scripts for rollup, Actual, Budget, Variance , Margin, Revenue, COGS, Sales , Monthly/Quarterly/Yearly Opening/Closing Inventory ,Expense calculation, Commission, payroll, discount, financial calculations.
7	Day 17 4 Hours	Writing Spread Sheet	Writing spear sheet reports for Top 'N' Analysis, Sales/Revenue/Margin/Expense reports based on time and market analysis.
8	Day 18 4 Hours	Web Reports	Writing web reports for Online Analysis
9	Day 18 2 Hours	Essbase Server Administration	Backing up, restoring users, groups creation
10	Day 18 2 Hours	Essbase Server Optimization and Monitoring performance	Writing MDX scripts to optimize the data load/Calc script.

Topic # 5 Hyperion Planning

Planning Overview, Dimensions and Data
Storage Overview

Setting Up the Period, Scenario, and Version
Dimension

Setting Up Entity and Account Dimension,

Loading Metadata from a File

Creating & Customizing Data Forms and
Folders

Entering Data on the Web & Smart View

Entering Data on the Web & Smart View

Creating Business Rules and Building Runtime
Prompts, Adding Formulas

Creating Basic Reports

Adding Auto Calculations and Mathematical
Functions

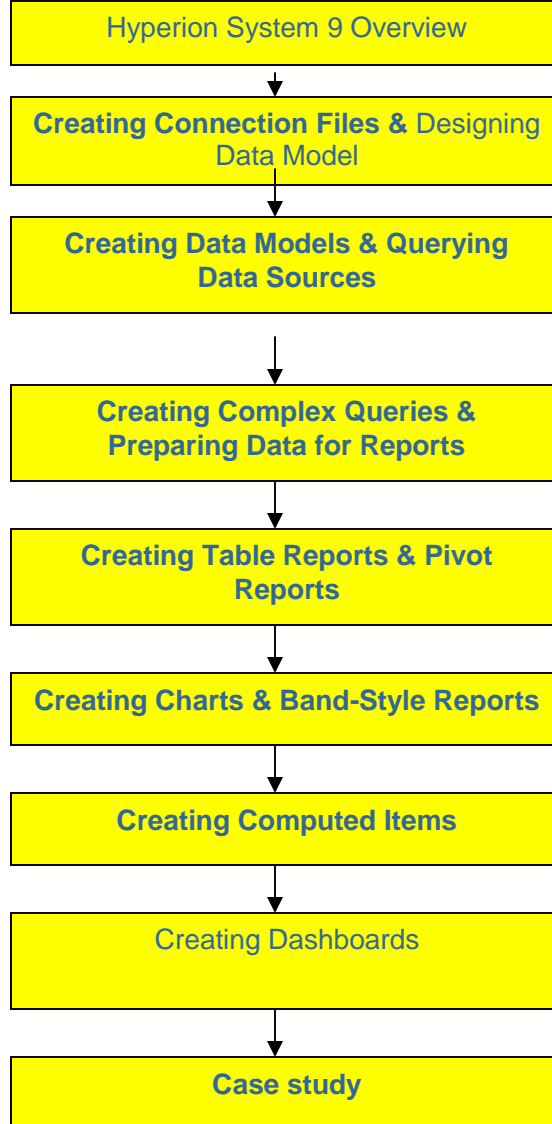

Creating, Manipulating and Distributing Web
Analysis Documents

Session #	Date and Time	Area of Focus	Session Topics
1	Day 19 Hours 1	Planning Overview, Dimensions and Data Storage Overview	Planning Overview Hyperion System 9 Overview Hyperion System 9 Planning Relationship Between Planning and Essbase Analytics Essbase Analytics Terminology Navigating the Planning Web Client
2	Day 19 Hour 1	Planning Dimensions and Data Storage Overview	Planning Dimensions and Data Storage Overview Planning Dimensions Overview Required Dimensions User-Defined Dimensions Dense Dimensions Sparse Dimensions Data Block Creation Process Selecting Aggregation, Data Storage, And Calculation Options
3	Day 19 Hour 1	Dimension creation	Setting Up the Period, Scenario, and Version Dimension <ul style="list-style-type: none"> • Time Periods Overview • Period and Year Dimensions • Setting up Dynamic Time Series • Choosing How Data is Stored • Scenario Dimension and Creating Scenarios • Version Dimension and Creating Versions
4	Day 19 Hour 1	Loading Metadata	Loading Metadata from a File <ul style="list-style-type: none"> • Time Periods Overview • Period and Year Dimensions • Setting up Dynamic Time Series • Choosing How Data is Stored • Scenario Dimension and Creating Scenarios • Version Dimension and Creating Versions
5	Day 19 Hour 1	Creating and Customizing Data Forms and Folders	Writing Data Forms Data Forms and Folders Overview Creating Folder Structures for Data Forms Data Forms Requirements Assigning Access Rights to Data Forms. Managing User Variables Setting Up User Preferences
6	Day 19 Hours 2	Entering Data on the Web Entering Data Through Smart View	Entering Data Submitting Data Using Data Forms Adjusting and Annotating Plan Data Calculating Data in Data Forms Smart View Overview Planning and Smart View Navigating Data Forms Entering and Calculating Data Accessing Data Offline

			Essbase Analytics and Smart View Performing Ad Hoc Analysis
	Day 19 Hours 2	Practice # 1 Creating sample application. Creating and customizing Data Forms Entering Data using Smart View and Web	
7	Day 19 Hours 1	Self Learning, Quiz and discussion.	
8	Day 20 Hours 2	Creating & Building Runtime Business Rules	Creating Business Rules Business Rules Overview Navigating Business Rules Business Rules Creation Process Launching Business Rules from the Web Printing Business Rules Runtime Prompts Overview Adding Runtime Prompts
9	Day 20 Hours 2	Adding Formulas to Business Rules Process Management	Writing Formulas Adding Auto Calculations to Data Rows and Columns Mathematical Functions and Properties Mathematical Operators in Expressions Formula Rows, Columns, and Cells Common Mathematical Functions Process Management Overview Managing Review Cycles for Planning Units Copying Data Between Versions
10	Day 20 Hours 2	Practice # 2 <ul style="list-style-type: none"> Building Business Rules Adding formulas 	
11	Day 20 Hours 2	Self Learning and Quiz	
12	Day 21 Hours 4	Creating Report Objects Adding Text Functions	Creating Reports Report Objects Overview Creating Text Boxes and Adding Images Saving and Inserting Report Objects Linking Report Objects Designing Headers and Footers Text Functions Overview Inserting Text Functions in Text Boxes, Headings, and Text Cells Creating Dynamic Values with Current Keywords Common Text Functions
13	Day 21 Hours 2	Reviewing Planning Data with Web Analysis Creating, Manipulating and Distributing Web Analysis Documents	Integrating With Web Analyzer Web Analysis Architecture Key Benefits of Web Analysis Key Concepts Navigating Workspace and Web Analysis Studio Workspace and Web Analysis Studio Tasks Defining Queries Setting Document Format Options Creating Chart Views Navigating Documents Manipulating Data Distributing Web Analysis Content
14	Day 21 Hours 2	Practice # 3 Creating Reports <ul style="list-style-type: none"> Navigating using Web Analysis. 	

15	Day 21 Hours 2	Self Learning	Visiting forums and identifying common issues and errors during
	Multiple Choice Questions (Day 19- Day 21) <ul style="list-style-type: none">• Planning Overview• Dimensions and Data Storage Overview• Creating and Customizing Data Forms and Folders• Enter Data using Web/Smart View• Building Business Rules• Integration With Web Analysis		

Topic # 6 Hyperion Interactive Reports

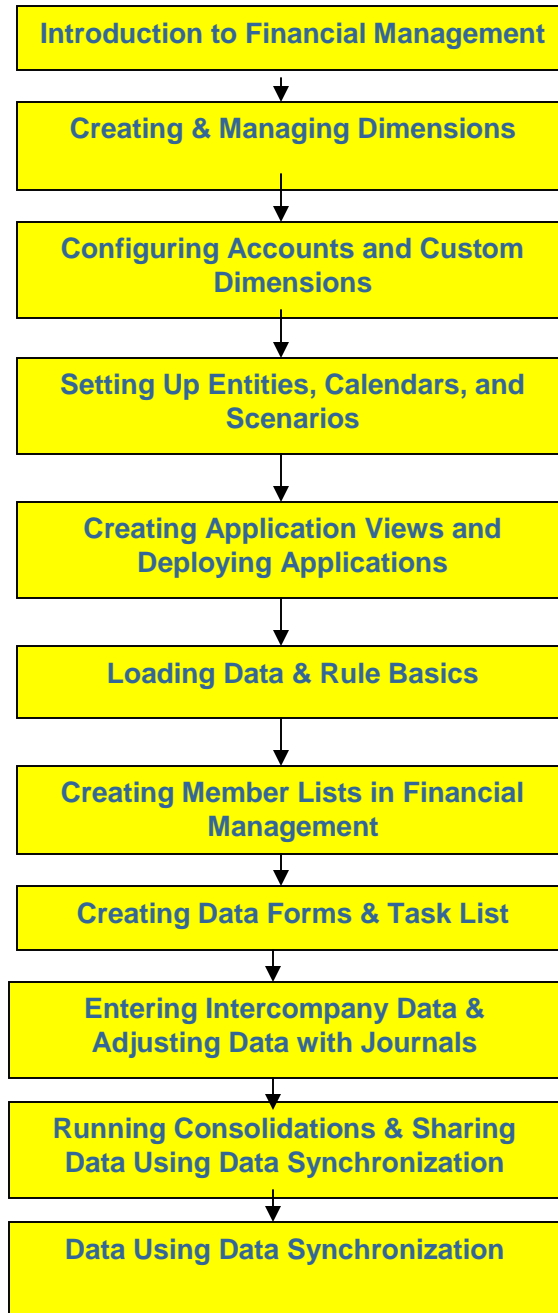

Session #	Date & Time	Area of Focus	Details
-----------	-------------	---------------	---------

1	Day 22 Hour 1	Hyperion System 9 Overview	Introduction to Hyperion System 9 Hyperion System 9 Components General Architecture of the Interactive Reporting Module
2	Day 22 Hour 2	Manipulating Interactive Reporting Documents & Creating Connection Files	Manipulating Interactive Reporting Documents Opening and Saving IR Documents Creating Basic Connection Files Setting Advanced Options in Connection Files
3	Day 22 Hours 2	Creating Data Models & Querying Data Sources	Creating Data Models & Querying Adding Topics to the Content Pane Joining Topic Items Modifying Topic and Item Displays Querying and Data Models Overview Adding Query Sections to IR Documents Investigating Underlying Data Requesting Items Filtering and Aggregating Queries
4	Day 22 Hours 2	Self Learning and quiz sessions	Self study through practice sessions Evaluation of training by conducting quizzes
<p>Practice #1</p> <ul style="list-style-type: none"> • Creating Simple reports • Creating reports with filters. • Creating Result set • Creating Computed Items 			
5	Day 23 Hours 3	Creating Complex Queries & Preparing Data for Reports	Creating Complex Queries Querying and Data Models Overview Requesting Items Filtering and Aggregating Queries Results and Table Sections Overview Creating Date Groups Creating Grouping Columns Filtering Data
6	Day 23 Hours 3	Creating Table Reports & Pivot Reports	Creating Table Reports Formatting Data Sorting Data Modifying Data Functions Applied to Fact Items Drilling into Data Spotlighting Values

			Grouping, Focusing On, and Hiding Labels
7	Day 23 Hours 2	Self Learning and quiz sessions	Self study through practice sessions Evaluation of training by conducting quizzes
		Practice #2 <ul style="list-style-type: none"> • Creating Advance reports • Complex reports with charts and Pivots. • Applying Drill Down/DrillUp Features 	
8	Day 24 Hours 3	Creating Charts & Band-Style Reports	Creating Charts & Band-Style Reports Designing Data Layouts Formatting Data and Modifying Chart Properties Creating Pivot Reports from Charts Analyzing Chart Data Embedding Pivot Reports and Charts Preparing Band-Style Reports for Printing
9	Day 24 Hours 2	Creating Computed Items	Creating Computed Items Computed Items Overview Creating Computed Items in Query Sections Creating Computed Items in Query Sections in Results, Pivots, Charts and Report sections
10	Day 24 Hours 3	Self Practice, Evaluations and quiz	Self study through practice sessions Evaluation of training by conducting quizzes
		Practice #3 <ul style="list-style-type: none"> • Creating Free Form Reports • Reports with advance formatting 	
11	Day 25 Hours 5	Creating Dashboards	Creating Dashboards Dashboards Overview Creating Master Documents Mass-Producing Master Documents Consolidating Dashboard Content Creating Dashboard Controls

12	Day 25 Hours 2	Case Study “Sales & Marketing Analysis”	Complete detailed case study and analysis
		Practice #4 <ul style="list-style-type: none"> • Designing simple Dashboards • Dashboard user Complex controls and Java Script implementations 	
	Multiple Choice Questions (Day 21- Day 25) <ul style="list-style-type: none"> • Hyperion Interactive reporting Overview • Manipulating Hyperion Documents • Creating Simple reports • Reports with Complex filters • Reports with Charts, Pivots , Graphs • Dashboard 		

Topic # 7 Hyperion Financial Management & Financial Reporting

** The HFM training starts with Functional Training.

**The 5-7 Hours functional training is included in HFM training which will be conducted by functional consultants.

**The day wise HFM Training plan will be provided soon.
