## **Hyperion Training Program**

S.N	Topic	Duration
0		(Hours)
1	Data Warehousing Fundamentals	4
2	Hyperion Analytics Services (Essbase), Essbase Integration	25
	Services, Essbase Studio, BSO, ASO	
3	Hyperion Web Analysis (Analyzer)	3
4	Hyperion Planning [After Essbase]	15

## **Deliverable:**

- 1. Students Guides.
- 2. Lab Guide.
- 3. Video Tutorials recorded session for missing classes.
- 4. Certification Questions
- 5. Essbase application "Sales Order processing".
- 6. Planning Application implementation "Work force Effective"

## **Topic # 1 Data Warehousing Fundamentals**

Session #	Date and Time	Area of Focus	Session Topics	
1	Day 1 Duration 5 Hours		DATA WAREHOUSE OVERVIEW	
	o nours		a. Overview	
			b. Typical uses	
			DEFINITION, ARCHITECTURE AND CONCEPTS	
			c. Enterprise Data Model	
			d. Operational vs. historical data	
			e. Extract Transform Load (ETL)	
			f. Metadata	
			g. Data warehouse vs. data mart	
			h. Data mining	
			i. OLAP vs. OLTP	
		Understanding	j. Massive size implementation	
		Understanding fundamentals of Data	k. Logical design vs. physical design	
		warehousing	<ol> <li>Normalization vs. denormalization</li> </ol>	
			m. Referential constraints	
			DATA MODELLING OPTIONS	
			n. Entity model	
			o. Star schema	
			p. Snowflake schema	
			DATA MODELLING DEVELOPMENT LIFE CYCLE	
			q. Requirements analysis	
			<ul><li>r. Requirements gathering</li><li>s. Schema design</li></ul>	
			s. Schema design t. Warehouse design	
			u. Implementation	
2	Day 1		v. Follow-up and review	
	Day 1 3 Hours	Self Learning	1 Developing understanding about	
		1	Data warehouse fundamentals and	
		Developing candidates understanding by reading case studies and exploring latest treads in current	<ol> <li>Exploring current trends and techniques.</li> </ol>	
		scenario.	Reading case studies(Visiting Forums/Case	
			studies).	

3	Day 2 Duration 1 Hour	Quiz # 1 & Discussion Data Warehousing Fundamentals Quiz.	1. Quiz to identify the how far candidates are comfortable with Data warehousing fundamentals understanding - I.
4	Day2 Duration 4 Hours		DIMENSIONAL MODELLING DESIGN  w. Overview x. Metadata properties y. Star schema
			z. Snowflake schema aa. Cubes bb. Measures and facts cc. Attributes and relationships dd. Dimension
			ee. Hierarchies ff. Joins gg. Summary tables and aggregation hh. Exercises
			IMPLEMENTATION OPTIONS
			ii. Overview jj. Top down kk. Bottom up II. Sizing mm. Cleaning nn. Populating the data warehouse
			EXTRACT, TRANSFORM & LAOD (ETL) CONSIDERATIONS
			oo. Definition and scope  pp. Extract options  qq. Transform options  rr. Load options  ss. Surrogate key concepts
5	Day 2 Self Learning 2 Hours	Understanding advance	tt. Slowly Changing Dimensions (SCD)  Developing DHW designing  constraints.
		DWH Concepts	Understanding DWH Design constrains and techniques.
			<ol> <li>Reading case studies (Visiting Forums/Case studies).</li> </ol>

6 Day 2 Session ending Quiz # 2 1 hour & Discussion	Quiz to identify the how good candidate is Data warehousing Design constraints and DWH understanding - II
---	---

Session #	Date and Time	Area of Focus Session Topics	
1	Day 3 1 Hour	Understanding the OLAP fundamentals with respect to Essbase	Online Analytical Processing Overview 1. Data Transformation. 2. Multidimensional View of Information 3.Multidimensional Data Model and Data Analysis Technique. 4. OLAP Solutions
2	Day 3 1 Hours	Hyperion system 9 overview and concept building for Analytical services	Analytic Services Overview  1. Business Performance Management 2. Hyperion System 9 Overview 3. Hyperion Analytic Solution 4. Analytic Services 5. Analytic Administration Services
3	Day 3 4 Hour	Understanding Multidimensional Database design implications. Defining Dimensions and its members.	<ul> <li>Creating Multidimensional Databases</li> <li>&amp; Application.</li> <li>1. Life Cycle of the Essbase Analytics     Database Design</li> <li>2. Creating Essbase Analytics     Applications and Databases</li> <li>3. Creating and Managing Database     Outlines</li> <li>4. Creating Time, Accounts, and     Scenario Dimensions</li> </ul>
	Day 3 2 Hours	Quiz , Discussion & Self Learning	Understanding Multi Dimensional Database concepts. Essbase Overview. Essbase fundamentals
4	Day 4 3 Hours	<ul> <li>Practice #1</li> <li>Creating multidimensional Database for sample application.</li> <li>Defining Dimension types for sample application.</li> <li>Real time issues during Database &amp; application creation.</li> </ul>	
	Day 4 1 Hour	Essbase Fundamentals Quiz #1  Essbase Quiz to identify candidate comfort level at MDD fundamentals and Essbase overview.	

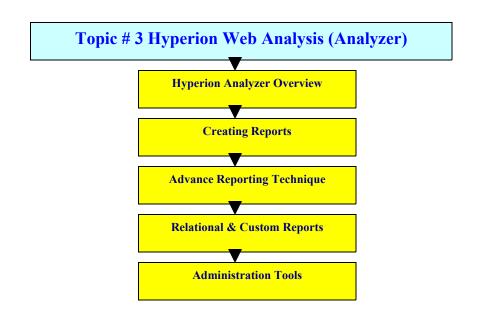

4	Day 4 2 Hours	Implementation of Dimensions and members in Essbase Outline	Enhancing Database Outlines  1. Creating Business-view Dimensions 2. Specifying Consolidation Operators and Defining Calculations 3. Setting Time Balance Properties 4. Creating Label-Only and Shared Members 5. Defining Duplicate Member Names and Member Aliases 6. Creating Attribute Dimensions
	Day 4 1 Hours	Self Learning & Discussion	Understand Essbase Outline, Dimensions, Members and Member type. Identify general issues/error occurs during outline creation.
5	Day 5 1 Hours	<ul> <li>Practice #2</li> <li>Creating Database outline for sample application.</li> <li>Defining Dimension and its members.</li> <li>Determining Dimension type and setting member properties.</li> <li>Issues while creating members and setting its properties.</li> </ul>	
	Day 5 1 Hour	Essbase Quiz #2 & Discussion	Essbase Quiz to identify candidates comfort level at MDD fundamentals and Essbase overview.
Understanding needs of Dynamic Dimension Building using Rule files.  Understanding needs of Dynamic Dimension Building using Rule files.  Rules Files  1. Data Prep Edit 2. Creating Dime Files 3. Selecting Dime 4. Defining Field 5. Validating Dime Files 6. Configuring Dimension Files		<ol> <li>Data Prep Editor overview</li> <li>Creating Dimensions using Rules         Files</li> <li>Selecting Dimension Build Method</li> <li>Defining Field Properties</li> <li>Validating Dimension Build Rules</li> </ol>	
	Day 5 3 Hours	An introduction to EIS	Creating Dimension and loading data using EIS.  1. Designing OLAP Model using EIS.  2 Building Metaoutling.  3 Building Dimension and loading data.
	Day 5 2 Hour	Self Learning	Understanding dynamic dimension

		building using rule files and Outline	
			Editor.
	Day 6 2 Hours	Practice #3 Dimension creation using own rule file (user defined) for the sample application. Runtime changing Dimension & its member properties. Issues involved during Rule file creation and execution.	
6	Day 6 2 Hours	Changing Dimension and Member type dynamically  Creating Advanced Dimension Build Rules Files  1. Creating Shared Members 2. Manipulating Fields 3. Creating User-Defined Attributes	
	Day 6 2 Hours	Attribute dimension overview	Creating Attribute Dimensions  1. Adding Attribute Dimensions to Outlines 2. Design Considerations for Attribute Dimensions 3. Creating Attributes with Rules Files
	Day 6 2 Hours	Self Learning & Discussion Scanning forums and identifying common issues and errors while creating Dimensions, Members a outlines.	
	Day 6 2 Hours	<ul> <li>Practice #4</li> <li>Setting member advanced properties using rule files for sample application.</li> <li>Common error and issues while Dimension building.</li> </ul>	
0	<ul> <li>OLAP fi</li> <li>Analyti</li> <li>Hyperio</li> <li>Multidi</li> <li>Essbas</li> <li>Basic o</li> <li>Various</li> <li>Rule fil</li> <li>Membe</li> <li>Attribu</li> </ul>	oice Questions (Day 3- Day 6) fundamentals ical Services (Essbase). ion System 9 imensional Database concept se Database Outline. operations on Database outline. s types of Outline les for Dynamic Outline preparation er properties(Shared, Never Shared, UDA) ute Dimension	
8	Day 7 Hours 4	Loading data into outlines and dealing issues during data loading.	Loading Data 1. Data Load Options 2. Loading Data from Flat Files 3. Performing Free-Form Data Loads 4. Loading Data with Rules Files 5. Loading Data from SQL Data

	Ι	Т	Courses
			Sources
	Day 7 Hours 2	<ul> <li>Practice #5</li> <li>Defining new Dimension as attribute type using Outline editor</li> <li>Defining new Dimension as attribute type using Rule Fil</li> <li>Free form loading data.</li> <li>Loading data using Rule files(with Multiple scenario) in Sample Basic application</li> <li>Loading data from SQL Source</li> </ul>	
	Day 7	Dealing with er  Session end	ror files. Issues related load data fail.
	Hour 2	quiz, Self Learning & Discussion	Visiting to the forums and identifying various means to upload data into Essbase. Optimizing the load process and various techniques to load data using rule and free form loading.
9	Day 8 4 Hours Day 8 2 Hours	Understanding & Implementing Business Rules using Calc Script  Practice #6	Calculating the Essbase Analytics Database  1. Outline Calculations 2. Calculation Scripts 3. Two-Pass Calculations 4. Dynamic Calculations 5. Dynamic Time Series  Writing basic calc script. Writing Outline calc script. Developing formulas. Calculating Time Series Data Developing Calculation Scripts Common error while writing calc scripts
	Day 8 2 Hours	Session end quiz, Self Learning & Discussion	Identifying commonly used formulas and issues associated with them.
	<ul><li>Loadin</li><li>Dynam</li><li>Buildin</li></ul>	hoice Questions (Day 7- Day 8) ing data under various scenarios (Free form and Rule Files). mic Outline creation with loading data. ling simple calculation scripts. nce calc scripts.	

10	Day 9 Hours 4	Navigating Data using report script and smart view(short cut)	1. Smart View Overview 2. Connecting to the Analytic Server 3. Retrieving Multidimensional Data into Two-dimensional Spreadsheet Reports 4. Navigating Through Spreadsheet Reports 5. Manipulating Multidimensional Data 6. Smart View Options. 7. Report Scripts.
	Day 9 2 Hours	Practice #7  Writing Report scripts (Essbase reports script) for sample Basic Database.  Writing basic Spread Sheet reports(Using Drill Down, Drill UP, Pivots)  Basic Spread Sheet Reports	
	Day 9	Issues and common error occurs during data retrieval.  Session end quiz, Self  Visiting forums and seeing sample	
	2 Hour	Learning & Discussion reports, i.e Top 'N' Analysis, Drill Down, Roll Up, Pivoting queries.	
	Day 10 3 Hours	Building reports using MS Excel with Hyperion Essbase client.	Advanced Spreadsheet Reporting 1. Updating Data on the Analytic Server 2. Creating Free-Form Reports 3. Selecting Members 4. Creating Reusable Queries 5. Extending the Spreadsheet 6. Environment with Visual Explorer
	Day 10 2 Hours	Understanding basic security policies and user management  1. User Management and Security 2. Controlling Access to Database Cells  Practice #8	
	Day 10 2 Hours		

Day 10 1 Hours	Session end quiz, Self Learning & Discussion	Viewing and implementing spread sheet reports and
Day 11 2 Hours	Practice #10	•
Day 11 3 Hours	Understanding various techniques to enhance Analytical Services Performance.	Monitoring Performance  1. Improving Analytic Services Performance. 2. Optimizing Analytic Services Caches. 3. Optimizing Database Restructuring. 4. Optimizing Data Loads. 5. Optimizing Calculations. 6. Optimizing Reports and Other Types of Retrieval.
Day 11 3 Hours	Session end quiz, Self Learning & Discussion	Understand the data load, Reports retrieval optimization techniques. Considering various real time scenarios. Issues and errors need to deal while implementing optimizing.
<ul><li>Data r</li><li>Data lo</li></ul>	ice Questions (Day 9- Day 1 etrieval using spread sheet oading using Spread Sheet ce Spread Sheet Reports	1)

Session #	Date and Time	Area of Focus	Session Topics
1	Day 12 Hours 3	Understand the installation steps and creating basic reports.	Installation of Hyperion Analyzer Setting up environment.
			Hyperion Analyzer Overview.
2	Day 12 Hour 1	Designing web reports	Creating Basic reports
	Day 12 Hours 2	Practice # 1	
	Day 12 Hours 1	Self learning	Visiting forums and identifying the real time implementation of Hyperion Analyzer reporting. Designing basic reports and sample reports.
	Day 12 Hours 1	Quiz & Discussion.	Identifying the needs of developing Analyzer reports and integrating with Essbase Database.
3	Day 13 Hour 2	Designing Custom Reports	Designing Pinboards, Custom reports, HTML Web Clients
	Day 13 Hours 1	Designing Advance Reports	Designing Advance and Relational reports.
	Day 13 Hours 1	General Analyzer Administration	Administration Tools
	Day 13 Hours 2	Practice#	Relational reports.
	Day 13 Hours 1	Self Learning	Identifying technical issues and sample case study.
	Day 13 Hours 1	Technical Discussion	Discussion about common issues and technique follows while report creation.
	<ul><li>Hyperior</li><li>Designing</li></ul>	Questions (Day 12- Day 13) Analyzer Concepts By web reports Analyzer Advance Designing	

\*\*\*\*Note: This case study is now part of Essbase Training.

Session #	<b>Date and Time</b>	Area of Focus	Session Topics
1	Day 14 Hours 2	Understanding Business Requirements	Explaining sales tracking system process flow diagram, various entities involved Draw ER Diagram.
2	Day 14 Hours 6 Day 15	Analyzing the current system and plan for the Database Outline	Writing SRS and process flow diagram. Technical documentations(HLD LLD)
4	Hours 4 Day 15 Hours 4	Dimensional Modeling Basics	Design Data Model. Identifying Dimensions,
		Process for designing a Database	Members, Measures (Fact Table), DWH Operations. Writing documentations for the all the above.
5	Day 16 Hours 8	Designing Multidimensional Database Outline & Loading Data from Flat files	Mapping DWH concept and design model with real time Essbase Outline designing. Loading data from Data Source.
6	Day 17 Hours 4	Customizing Calculation script	Writing basic calculations scripts for rollup, Actual, Budget, Variance, Margin, Revenue, COGS, Sales, Monthly/Quarterly/Yearly Opening/Closing Inventory, Expense calculation, Commission, payroll, discount, financial calculations.
7	Day 17 4 Hours	Writing Spread Sheet	Writing spear sheet reports for Top 'N' Analysis, Sales/Revenue/Margin/Expense reports based on time and market analysis.
8	Day 18 4 Hours	Web Reports	Writing web reports for Online Analysis
9	Day 18 2 Hours	Essbase Server Administration	Backing up, restoring users, groups creation
10	Day 18 2 Hours	Essbase Server Optimization and Monitoring performance	Writing MDX scripts to optimize the data load/Calc script.

Session #	Date and Time	Area of Focus	Session Topics
1	Day 19	Planning Overview,	Planning Overview
'	Hours 1	Dimensions and Data	Hyperion System 9 Overview
		Storage Overview	Hyperion System 9 Planning
			Relationship Between Planning and
			Essbase Analytics
			Essbase Analytics Terminology
			Navigating the Planning Web Client
2	Day 19	Planning Dimensions	Planning Dimensions and Data
	Hour 1	and Data Storage Overview	Storage Overview
		Overview	Planning Dimensions Overview Required Dimensions
			User-Defined Dimensions
			Dense Dimensions
			Sparse Dimensions
			Data Block Creation Process
			Selecting Aggregation, Data Storage, And
			Calculation Options
3	Day 19	Dimension creation	Setting Up the Period, Scenario, and
	Hour 1		Version Dimension
			Time Periods Overview
			Period and Year Dimensions
			Setting up Dynamic Time Series
			Choosing How Data is Stored
			1
			Scenario Dimension and Creating     Scenarios
			Scenarios
			Namina Biannaian and One-time
			Version Dimension and Creating     Versions
4	Day 19	Loading Metadata	Loading Metadata from a File
7	Hour 1		
			Time Periods Overview
			Period and Year Dimensions
			Setting up Dynamic Time Series
			Choosing How Data is Stored
			<ul> <li>Scenario Dimension and Creating Scenarios</li> </ul>
			Cochanos
			a Manaian Dinasanaian and Constitut
			Version Dimension and Creating     Versions
5	Day 19	Creating and	Versions Writing Data Forms
	Hour 1	Customizing Data Forms	Data Forms and Folders Overview
		and Folders	Creating Folder Structures for Data Forms
			Data Forms Requirements
			Assigning Access Rights to Data Forms.
			Managing User Variables
			Setting Up User Preferences
6	Day 19	Entering Data on the	Entering Data
	Hours 2	Web Entering Data Through	Submitting Data Using Data Forms
		Smart View	Adjusting and Annotating Plan Data
			Calculating Data in Data Forms Smart View Overview
			Smart view Overview   Planning and Smart View
	1	1	I i laming and omait view

			T		
			Navigating Data Forms		
			Entering and Calculating Data		
			Accessing Data Offline		
			Essbase Analytics and Smart View		
			Performing Ad Hoc Analysis		
	Day 19	Practice # 1			
	Hours 2	Creating sample application			
		Creating and customizing D			
		Entering Data using Smart \	√iew and Web		
7	Day 19	Self Learning, Quiz and	T		
1	Hours 1	discussion.			
8	Day 20	Creating & Building	Creating Business Rules		
	Hours 2	Runtime Business Rules	Business Rules Overview		
			Navigating Business Rules		
			Business Rules Creation Process		
			Launching Business Rules from the Web		
			Printing Business Rules		
			Runtime Prompts Overview		
			Adding Runtime Prompts		
9	Day 20	Adding Formulas to	Writing Formulas		
	Hours 2	Business Rules	Adding Auto Calculations to Data Rows and		
		Process Management	Columns		
			Mathematical Functions and Properties		
			Mathematical Operators in Expressions		
			Formula Rows, Columns, and Cells		
			Common Mathematical Functions		
			Process Management Overview		
			Managing Review Cycles for Planning Units		
			Copying Data Between Versions		
			copying Data Dotticon Volcions		
10	Day 20	Day 20 Practice # 2			
	Hours 2	• Building Business Rules			
		Adding formulas			
11	Day 20	Self Learning and Quiz			
10	Hours 2	Constitute Description of the state			
12	Day 21	Creating Report Objects	Creating Reports		
	Hours 4	Adding Text Functions	Report Objects Overview		
			Creating Text Boxes and Adding Images		
			Saving and Inserting Report Objects		
			Linking Report Objects		
			Designing Headers and Footers		
			Text Functions Overview		
			Inserting Text Functions in Text Boxes,		
			Headings, and Text Cells		
			Creating Dynamic Values with Current		
			Keywords_		
			Common Text Functions		
13	Day 21	Reviewing Planning	Integrating With Web Analyzer		
	Hours 2	Data with Web Analysis	Web Analysis Architecture		
		Constinue Manufactural	Key Benefits of Web Analysis		
		Creating, Manipulating	Key Concepts		
		and Distributing Web	Navigating Workspace and Web Analysis		
		Analysis Documents	Studio		
			Workspace and Web Analysis Studio Tasks		
			Defining Queries		
			Setting Document Format Options		
			Creating Chart Views		

		Managing the Approval	Navigating Documents Manipulating Data Distributing Web Analysis Content  Managing the Approval Process and Creating		
		Process and Creating Task Lists	Task Lists Managing the Review Cycle for Planning Units Copying Data Between Versions Copying Data Navigating Task Lists Task List Creation Process Building Task Lists and Assigning Access to Task Lists Validating Task Lists Reporting on Task Lists		
14	Day 23	Practice # 3 Creating Reports			
	Hours 2	Navigating using Web Analysis.			
15	Day 23 Hours 2	Self Learning	Visiting forums and identifying common issues and errors during		
	Multiple Choice Questions (Day 19- Day 21)  Planning Overview Dimensions and Data Storage Overview Creating and Customizing Data Forms and Folders Enter Data using Web/Smart View Building Business Rules Integration With Web Analysis
